INJECTION TECHNIQUE

Double inflatable packer Flex

Our double inflatable packer flex has been optimized to include a flexible distancing section making nearly all lengths available for your injection work. Our product selection includes all the common sizes and required accessories.

Just ask us and we'll provide you with all the information you need about approved inflation pressures.

Applications include: solidification of the ground at a wide variety of depths, solidification of loose and cracked stone, injections in structures as well as in the ground underneath structures and waterproofing seals.

Steck-O-Connectors – Safe and simple

Steck-O-Connectors are a simple and safe way to connect injection equipment, mixing heads, tubes and many more devices together in both high and low pressure applications.

Our product range includes standard connectors in DN10 and DN13. We can also offer custom threading sizes upon request. Our customers from the tunnel construction industry have relied on our generous stock policy and nearly perfect logistical arrangements for many years.

Coni blind packer – Perfect for conical drill holes

If you need to cap conical bore holes, anchor ducts or pipe conduits quickly and securely, then our Coni blind packer might be the solution you need. Our stainless steel Coni blind packer seals against water, dirt, pests, and messes of all kinds. Tightening the packer in its opening is only a matter of a few turns of a socket wrench on the tightening nut. Equally suitable for downward applications.

Blindpackers can be re-used. Just screw them out and tighten them again in another place. Socket wrench lengths of 160, 250 and 500 mm make our Coni blind packers suitable for use at a variety of depths.

Machine comparison: 2C and 3C piston pumps

Each injection pump has its own characteristics. Compare the technical specifications at a glance. Which injection pump has the greatest output and what pressures does it operate at?

Try our [machine comparison](#) to find out which pump is most suitable for your application.

COMPANY

B + B – Product of the year – Vote and win!

We have entered our DESOI AirPower S25 series in the readers choice competition sponsored by B + B Bauen im Bestand.

Check it out now and support us with your vote (German language only). Our injection pumps with pneumatic drive and integrated control are listed in the category "Geräte und Werkzeuge" (Equipment and Tools) With a little luck you could even win a Galaxy XCover 4S.

At the end of the year ...

One man waits for the times to change, the other seizes the day and acts. (Dante Alighiere)

Thank you for your faith in us and we wish you success and health in the new year. Enjoy a peaceful and relaxing holiday in the company of your family! We look forward to continuing our work together in the coming year.
