

**Dear Sir or Madam,**

Just in time for the start of your summer break, we present you this update with news and innovations. Send us a mail or give us a call - we'll be happy to provide additional information or consult with you on how best to overcome the challenges you're facing.

*Your Desoi Team*

## INJECTION TECHNIQUE

### DESOI Injection Abc Third Edition, available now!

New design, revised, and including new terms.

**Order the reference work for construction specialists now.**

The subjects of construction sealing, building maintenance, and the preservation of buildings through injection are hardly mentioned during the education of engineers and other specialists. The result is that technical guidelines for the planning and execution of injection projects and quality control are interpreted in different ways.

In our continuing effort to address this deficit, we have published our newest edition of the ABCs of Injection. It is the result of 40 years of practical work, during which we have been working together with construction specialists, engineers, scientists and researchers in the field of construction. A multitude of suggestions and ideas have motivated us to create this completely revised third edition of our definitive reference work.

The ABCs of Injection is available in German, and will soon be available in English and French as well.

### Blind packers – The inexpensive alternative to sleeves, plugs, and etc.

Fast and secure sealing of bore holes, conduits and ducts. Blind packers provide a secure seal against water, impurities, pests and much more besides. Locking the packer in the opening is as easy as turning a bolt with a wrench, even while working over your head in the ceiling. Our product range includes a variety of diameters and lengths. Our newest product is the blind packer LM in stainless steel. The rubber we use is suitable for contact with food or drinking water! This blind packer is available in the diameters 22 and 25 mm.
