

Dear Sir or Madam,

At the beginning of spring, we will surprise you with new ideas and products from Desoi.

We are YOUR partner for injection technology, engineering and thread unscrewing units.

Write to us or give us a call. We will be happy to advise you individually or send you further information material.

Your Desoi Team

INJECTION TECHNIQUE

REPAIR OF EXPANSION JOINTS - DESOI Quick Seal in use

A long-time customer of ours explains the installation and application of the DESOI Quick Seal in the video. The application took place in a cut-and-cover tunnel in Israel.

Have a look and convince yourself of the easy installation and the application when injecting with acrylate gel. [Play the video!](#)

DESOI Quick Seal - sealing and injection profile

With DESOI Quick Seal, expansion, construction and movement joints are reliably sealed. The up to 7-segment rubber profile is inserted into the damaged joint, fixed and back-pressed with a building chemical filling material. It can be divided and is suitable for joint widths of 18 to 26 mm. Time is saved during installation because there is no need to drill and the variable segments can be installed quickly and easily. [Order online now!](#)

Universal adhesive packer for injection mixer

The universal adhesive packer with a diameter of 50 mm can be used for all common 2-component cartridge injection systems. The tapered receptacle for the injection mixer ensures that the tip is securely held and thus guarantees a clean injection.

The cross sliding valve can be easily closed and prevents the injection material from flowing back - no opening pressure necessary.

SPRAYING LANCE - For cleaning of boreholes

With the spraying lance you can clean boreholes with a diameter of 16 mm or more from drillings, fragments, dust, etc. The lance flushes out the borehole with water from the back to the front. The spray lance can be extended individually for greater depths. The protective cover protects against debris spraying out and is an indispensable accessory.

Would you like to REFRESH your expertise?

Keep an eye on the **changing and new topics!**

**Injection packer - Polymer filling material
Products & Application**

Basics topics: Structure/components, types/use, connection/accessories
Dates: 23rd March, 11 am. / 30th March, 11 am.

**Injection packer - Mineral filling material
Products & Application**

Basics topics: Structure/components, types/use, connection/accessories
Dates: 25th March, 11 am. / 1st April, 11 am.

The web seminar consists of 30 minutes of lecture time, questions will be answered afterwards and can be submitted in writing at any time. You will receive a confirmation email with information on how to participate in the web seminar. Participation is free of charge. A maximum of 100 participants can take part in the web seminar. **Further web seminars are currently being prepared. To make sure you don't miss anything, check our website often or follow us on Facebook, LinkedIn, Instagram and XING.**

COMPANY

Quality and environmental management

For the third time, the high level of our diverse business areas was confirmed in the surveillance audit.

We were certified by DEKRA in the area of environmental management (ISO 14001:2015). The management system (ISO 9001:2015) of DESOI GmbH also continues to meet the requirements.

Always a step ahead

We have the solution for your problem. And if we do not have the right product in stock, we will simply develop something new. Fast, reliable and individually tailored to your needs - that distinguishes DESOI. The quality of our products and the technical know-how have made us the world's leading manufacturer of injection technology and industrial equipment.

It is our own standards that drive us as a service provider to research and test innovative solutions and manufacture them in our own production facilities. The result is products that are tailor-made and can be used worldwide. But our mission goes one step further. Because our customers should not only receive the best goods, but also the best possible advice. And so we pass on our knowledge in seminars, videos, brochures, product information and much more. A company concept that provides our customers with all-round support and advice from the first second to the completion of the project.
